HELMET SAFETY

A proper fit should be a little tight at first. It will loosen up a bit as the helmet is broken in.

There are three helmet safety ratings you'll commonly see:

- DOT (US Department of Transportation)
- ECE (UN Economic Commission for Europe)
- Snell (a non-profit organization dedicated to helmet safety)

Never buy or sell used helmets. The pads have formed to a specific head shape, and will not work properly on a different head.

Helmets are designed to endure a single moderate impact. If involved in any significant crash, replace your helmet.

YOUTH

INTRODUCING KIDS TO RIDING

- » Before anything else, make sure they have a youth helmet that fits properly.
- » Don't start your kids on a machine that's too powerful. Have 6-8 year olds begin with a 50cc ATV and a RZR® 170 for those 10-12.
- » Invest in quality bumpers & brushguards. Little accidents are going to happen.
- » Understanding terrain is essential. Teach them how to read and react to changing conditions.
- » Keep it fun. After all, that's what off-road riding is all about.
